

AMRUTA SALAGARE

9008008973 | amrutasalagare2609@gmail.com | [LinkedIn](#) | [Github](#)

EDUCATION

ATME College of Engineering, Mysore
Bachelor of Engineering, CSE in AI&ML (Hons.)

2022 - 2026
CGPA – 8.9

EXPERIENCE

Hindustan Aeronautics Limited (HAL)
Intern

Jan 2026 - Present
Bengaluru

Soul AI
Prompt Engineer (Freelance)

Nov 2024 – Present
Remote

- Reviewed and scored AI model outputs across multiple LLMs using standardized rubrics contributing to improved answer quality and consistency.

PROJECTS

Intelligent Traffic Management System | Computer Vision

[Repo Link](#)

- Built a real-time edge-AI traffic system using YOLOv11 (ONNX) on CPU-based Raspberry Pi, achieving 3–5× inference speedup and >93% vehicle counting accuracy via ONNX Runtime, ROI filtering, and centroid tracking.
- Integrated emergency-aware signal control with ambulance detection, dynamic timing logic, and a real-time monitoring dashboard.

StreeRaksha - Women's Safety platform | AI

[Repo Link](#)

- Architected a real-time threat detection system using YOLO, MediaPipe, and MobileNetV2 on edge IoT (Raspberry Pi) for live CCTV-based person tracking and gender reclassification.
- Delivered end-to-end alerting platform with FastAPI backend, real-time dashboards, and automated evidence logging.

AgroBalance – AI-Powered Smart Farming System | IoT

[Repo Link](#)

- Engineered a precision farming solution using real-time NPK soil sensors with ML pipelines (Neural Networks, Random Forest) for automated crop and fertilizer recommendations.
- Deployed a full-stack system with Flask APIs, IoT hardware integration, and web/mobile interfaces.

Lung Disease classification | Deep Learning

[Repo Link](#)

- Designed a CNN-based classifier using VGG19 transfer learning for multi-class chest X-ray diagnosis, achieving 96% accuracy with strong precision, recall, and F1-score via data augmentation.
- Deployed a lightweight Streamlit web app for real-time lung disease prediction.

SKILLS

- Languages:** Python, C, SQL, HTML, CSS.
- Tools:** VS Code, Git, GitHub, Jupyter Notebook, Google Colab, Tableau, Power BI.
- Libraries & Frameworks:** NumPy, Pandas, TensorFlow, Keras, PyTorch, Scikit-learn, Streamlit, OpenCV, FastAPI, Flask, MongoDB.
- Coursework:** Operating Systems, DBMS, Computer Networks, OOP

EXTRACURRICULAR

- Program Head** - IEEE Student Branch Chapter, **Stage Committee Head** - IET On Campus, ATMECE
- Runner-up - Code Battle 2K24** | Participated in multiple national-level hackathons
- Hackathon Organizer - Tech Avishkar 2.0** | Led a 200+ participant event with workshops and expert talks
- Certifications** – [Building LLM Applications with Prompt Engineering](#) | [Explore Machine Learning with TensorFlow](#) | [Introduction to Oracle – SQL](#) | [Analytics using Tableau](#) | [Database and SQL](#) | [Web Development](#) | [Python for Data Science](#)
